

Inject Bipack

Wächter & Co has been selling injection-molded items with tamper-evident closures since 2008. The range has grown steadily since then. The entire range is now so extensive that we can provide our customers with every imaginable item from 80 ml to 21 liters.

We print some of these items in-house.

This enables small print runs of 10,000 pieces or more.

For larger runs, we finish the items with an IML (in-mold label).

This is the highest quality level of finishing.g.

Our injection-molded range contains 4 product groups

1. Buckets

Round buckets from 2.8 liters to 21 liters in excellent Made in German quality

2. Series A

Round and rectangular cups, functional and inexpensive. All items available as a combination pack.

3. Series D

Round, rectangular and square cups in a wide variety of sizes.
These packages are of very high quality.

4. Series R

The injection-molded packaging par excellence!

Good quality, unbeatable value for money!

Rectangular cups in the well-known 108 x 86 mm format from 100 - 500 ML,
Round cups and oval bowls from 150 ML - 250 ML.

We have the right item for every product range.

**Whether printed or with a high-quality IML,
these packagings make every filling look simply great.**
